

BOS – Environmental Policy

As an environmentally conscious company, the BOS Group has introduced an environmental management system to protect the environment in which we live and work.

ENVIRONMENTAL
AWARENESS

In addition to the constant search for new ways to protect the environment, and respecting planetary boundaries the BOS Group takes the following aspects into account:

- Implement necessary flood protection and BOS Water Policy
- Proactive avoidance of harmful effects on the environment in all our activities, taking into account biodiversity, ecosystems, soil quality, land use, desertification, deforestation and animal welfare
- Using processes with the lowest possible environmental impact
- Sustainable and environmental friendly product development
- Natural resources management taking into account energy efficiency, renewable energies and decarbonization
- Avoidance of Greenhouse Gas Emissions (GHG) and pollution to air, water and soil
- Waste reduction & prevention including reuse and recycling where ever possible
- Compliance with country-specific legal requirements and environmental regulations at all locations, including noise levels of 70 db(A) in the industrial area
- Involvement of our suppliers to avoid environmental pollution and achieve continuous improvements in sustainability

We regularly evaluate our environmental protection activities with the aim of continuous improvement in terms of

- Energy consumption (ongoing reduction and use of renewable energy)
- Air quality (avoidance of GHG emissions and air pollution)
- Chemical Substance Management / Hazardous materials (Monitoring and reduction)
- Efficient use of the raw materials considering waste reduction, waste prevention, recycling and reuse
- Reduction of environmental pollution with regard to biodiversity, soil quality, land use, desertification, deforestation and animal welfare
- Sustainable resources management

In conjunction with our sustainability management, we continually promote our employees understanding of our environmental policy as well as all other policies on sustainability, occupational & health and the natural resource water.

For qualitative objectives and quantitative targets please refer to the Group Sustainability Targets found on the Sustainability Drive intranet site.
