

# BOS – Environmental Policy

In order to protect the environment in which we live and work, the BOS Group has introduced an environmental management system as an environmentally friendly company.

ENVIRONMENTAL  
AWARENESS

In addition to the constant search for new ways to protect the environment, the BOS Group also takes the following aspects into account:

- Proactive avoidance of harmful effects on the environment in all our activities, taking into account biodiversity, soil quality, land use, deforestation and animal welfare.
- Using processes with the lowest possible environmental impact
- Sustainable and environmental friendly product development
- Careful handling and use of natural resources
- Commitment to safely managed water including Sanitation and Hygiene in the workplace.
  - Reducing water consumption and avoiding risks of water pollution
  - Risk assessment of water use in the identification of significant environmental aspects
- Avoidance of Greenhouse gas emissions (GHG) and air pollution
- Hazardous substance management (handling, storage, transport, disposal)
- Compliance with specific national legislation and environmental regulations at all sites of the BOS Group
- Involvement of our suppliers to avoid environmental pollution and achieve continuous improvements in sustainability

Our environmental activities are regularly evaluated in order to achieve continuous improvement with regard to

- Energy consumption (ongoing reduction and use of renewable energy)
- Water consumption and water quality (ongoing reduction and avoidance of water pollution risks)
- Air quality (avoidance of Greenhouse gas (GHG) emissions and air pollution)
- Hazardous substance management (reduction of hazardous substances used)
- Optimised utilisation of the raw materials used
- Reduction of environmental pollution with regard to biodiversity, soil quality, land use, deforestation and animal welfare.
- Careful utilisation of natural resources

Internal training and programmes are used to continuously increase our employees' understanding of our environmental policy, environmental protection measures and environmental awareness.
